The RAMS Horn

Obituary

Mark Meyrose

We are sad to report that club member Mark Meyrose passed away on October 10th. He had just turned 69 years old.

Mark was always a familiar face at the RAMS field and club meetings. His passion for the hobby was an inspiration to others. Over the years, Mark had done it all—from combat to warbirds to biplanes to aerobatics to helicopters and most recently FPV quads. He wore many hats in the club as well. He was our previous field care-taker, a flight instructor, and also heavily involved in our sister club, SWARM. Being incredibly knowledgeable, Mark was a great advice giver, excellent story teller, and a life long friend.

Field Photos

Night Flying

Have you ever been out at the RAMS field after the sun has gone down? It's really dark out there and frankly, a little creepy. Good thing we can light up the sky. Below are some pictures of Mike McCullough's Night Radian glider on it's first night flight. The LED lights looked super-cool in the air. Hopefully no one reported seeing a UFO that night.

Monthly Recap

October in Review

October turned a bit cold and a little wet. It seems like there has been a little bit of water on the West end of the field the whole month. There is still some activity at the field on nice days and hopefully there will be a few more nice weekends in November. The daylight savings time adjustment of “falling back” pretty much is the end of the after work flying days for the season.

At the last meeting, we had quite a few folks bring in some planes for show and tell. Hopefully, we will continue to see some winter projects too!

Jeff Wisneski brought in his BTE Reaction jet that we have been long anticipating seeing. She's ready to maiden, just waiting for favorable flying conditions.

Mike McCullough brought in his E-Flite Night Radian glider with embedded LED lights.

Bob Glowienka started working on his Phoenix Models Westland Lysander ARF that he found at the Flying Electronics Swap Meet the previous month.

Steve Ward brought in some micro models and performed a “small” airshow at the end of the meeting.

Field Photos

Mustang Rescue

Thanks to Jeff Wisneski for providing us some aerial photos of the field and a Mustang rescue operation. This plane was lost for a couple of months and was found with some luck. Todd Schmitt took on the brutal walk through the tall grasses and showed us what it's like to be a tiny spec way out there.
