**MILWAUKEE CO R/C  
ASSOCIATION DELEGATES**

Tom Young  
Bob Glowienka

# The RAMS Horn

**A Note from the President**

## Greetings from the New President

**By Jeff Wisneski**

To start, I owe you, the members, a thank you. We have a great membership base that has been growing. My first experience being a member of the RAMS club is just over twenty years ago. During the times that I have been a member, I have always found mentors and friendship within the club. For me the club is more than a place to fly, it is a place to learn and grow. It is a place to inspire the next generation. In a world with so many screens I believe our hobby plays a vital role in providing the youth with ways to learn with their hands. The club provided me with that exact experience when I was young and I am happy to serve as President of a club that I believe in so much.

I cannot thank Jeff Borowski and Steve Ward enough for their service in office for this club. They both have served our club for that past seven years ensuring us a place to gather and fly. To me the meetings are about two distinctly different things. There is a business part and a fun part. I would like to thank Steve Ward, not only for serving as Vice President, but also for being extremely active in the fun part. I look forward to the meetings because of the show and tell where we get to see the new toys our members have and the new challenges that our members are overcoming. Steve, please keep on bringing in new and exciting things to show us that you have been up to. That welcome goes out to all of the members, I love that part of the meeting.

My thanks also goes to Jeff Borowski for helping me transition into the role, and I think I will owe him more thanks as the year progresses. At the field and behind the scenes we have members that take care of our website, put together our newsletter, maintain our field, handle our funds responsibly, and look out for our safety. Without these efforts we simply would not function. So again, thank you. It is my deepest concern to protect our club and ensure that we have all these great opportunities to gather and fly going into the future. Let's remember to fly safe, follow the rules, and treat each other with respect. I look forward to being a member of this great club, in any capacity, for a long time.

## AROUND THE AREA

## Monthly Recap

## January in Review

At the January meeting, we held our club officer elections. As a result, we have a new president and vice president leading the club this year. We also have a new delegate for the R/C Association meetings.

**Todd Schmitt** brought in his Top Flite P-47 that he has built from a kit. The plane is primed, detailed, and about ready for paint. Also shown is a close up of his detailed rivets and panel lines.

**Jeff Borowski** is keeping us up to date on his pulse jet support equipment. This is what a man looks like holding 18,000 volts! Jeff brought in the ignition system for the pulse jet. It produces a spark about 3/4 inch long that is continuous which will cause the fuel to initially ignite.
